Euro-star Indexes: Where does the information come from?

Suckler Beef Value: This is a measure of Overall beef merit combining all sub indexes

Weanling Export Index:

Individual on farm and mart weaning weights (150 - 300 days).
Individual weanling price per kg from sales at marts.
Linear scoring information recorded by ICBF trained scorers.
Farmer scored calf quality recorded through suckler welfare scheme.

Beef Carcass Index:

Carcass weight, carcass conformation and fat.
Feed intake measured at Tully.
Linear scoring information recorded by ICBF trained scorers.
Weaning weight and liveweight information.

Daughter Fertility Index:

Daughter age at first calving from calf birth records.
Daughter calving difficulty recorded at calving time through Animal Events (scale of 1 to 4)
Daughter calving interval from calf birth records.
Daughter survival to calve again from calf birth records.

Daughter Milk Index:

On farm and mart weaning weights (150 - 300 days) where the sire of the dam and the sire of the calf is known.

Other Key traits:

Calving difficulty: from scale of 1 to 4 recorded at calving time.
Gestation: from cows with an insemination date and subsequent calving date.
Docility: From docility recorded through suckler welfare scheme and linear scoring. Where an animal has both scores recorded the docility from the linear scorer is the value used in the evaluation

***** = Top 20% of the Breed

**** = Between Top 40% and Top 20% of the Breed

*** = Breed Average

** = Between Bottom 40% and Bottom 20% of the Breed

* = Bottom 20% of the Breed

The breed percentiles are based on all pedigree male and female animals born in the previous 5 years. The % ranks in the catalogue vary from 1% (Bottom 1% of the breed) to 100% (Top 1% of the breed)

Muscle = 1 + 2 + 3(x2) + 4 + 5
Skeletal = 6(x2) + 7 + 8 + 9
Functional = 10 + 11 + 12 + 13

Breed Society Publication rules (from 1st January 2010)

1. Evaluations will be run once a month
2. For each monthly evaluation the cut-off date after which animals scored will not be included will be 15th day of the month.
3. New evaluations for linear and Euro-Stars will be available on the 1st week of the following month
4. Animals must be scored & weighed in a group of 5 (may include commercials) and between 150-300 days for their information to be included in the Euro-Stars and linear type trait evaluations.
5. Animals submitted for scoring must be on the farm for a minimum of 2 months
6. Groups scored with very large variation in condition score may be refused entry to the evaluation.
7. Animals will have Euro-Stars or GROW linear graphs published with their performance included in the figures if:
 - a. Animal was scored in 150 - 300 age and in a group of 5 or more. The other animals in the group must also be in the 150 - 300 day age range.
8. Animals will have parental average Euro-Stars and GROW linear graphs if:
 - a. Animal was scored but was either outside the age range or in a group less than 5
9. Animals will have parental average Euro-Stars only published if:
 - a. Animal was not scored but a group of 5 was not possible
10. Animals will have ancestry information only published if:
 - a. Animal was not scored but a group of 5 was possible
